

INDUSTRY

Government

GOAL

Migrate to Google Drive

Challenges

- Over 3TB of archived unstructured data in shared drives & legacy document mgmt.
- Heavy reliance on paper across departments.
- Significant amount of business documents (Project documents, contracts, HR, etc.) only exist on paper and need to be scanned, indexed and classified
- Disorganization preventing efficient migration to Google Drive.

Outcomes

- To know what they have.
- Reliable data for other systems to use.
- Reduce storage costs by 40% or more.
- Retire redundant legacy capture tools.
- Deliver ROI within 12 months.

Haystac Solution

- Profile content across shared drives, eliminate ROT
- Classify existing and new content for Google Drive.
- Enable intelligent scan on-demand with Integrated classification/extraction.

The Haystac Difference

- Multiple Machine Learning methods
- R.O.T. detection
- Manages both ESI and Scanned files in one platform
- Both Visual and Textual classification methods for images
- Outlier detection
- The Google platform does not provide tools like ours.
